524 & 724 Aluminum Platform Trailers

Engineered excellence.

524 & 724 Aluminum Platform Trailers

Engineered Excellence

The tradition of Benson International value continues with two quality engineered, all-aluminum platform trailers.

Both the 524 and 724 models are designed and manufactured by experienced and professionally-trained Benson International employees, insuring years of reliable trouble-free service hauling a wide range of materials from large single coils to high volume building materials. Offering a five-year limited warranty, no application is too great or too small. Trust in the durability and value the 524 and 724 models provide.

524 Aluminum Platform Trailer

The 524 base model is anything but standard.

With weights as low as 7,990# for a 48' x 102", to a heavier haul unit able to haul a 52,000# concentrated load in a 4' span, this is the perfect trailer to maximize the operator's payload on those 80,000# non-permitted loads.

724 Aluminum Platform Trailer

Need more hauling capability?

With a concentrated load rating of 72,000# in 4' span and 140,000# evenly distributed, the 724 handles the extreme hauling loads in special heavy haul and multi-axle applications.

BULKHEAD:
Optional: Removable or permanent, aluminum D.O.T. rated.

MID-TURN:
L.E.D., standard on all units.

FLOOR:
Smooth Ribbed deck is standard, with optional Anti-Skid decking available.

FLOOR NAILERS:
Three floor nailers standard, with options of two or none.

TOOL BOXES:
Optional single and double door tool boxes available with a variety of mounting locations.

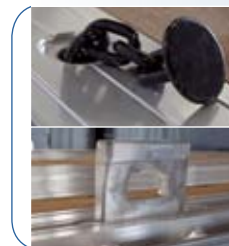

REAR CLOSURE:
Optional Full Filler Plate offers rear spray protection, allows additional lighting and company I.D. decal placement.

AIR & ELECTRIC CONNECTIONS:
Centered on front with optional offset to driver side or in front of landing gear available.

"LL" WINCH TRACK:
Standard on driver side. Optional additional track on curb side with standard or low-profile winches available.

CARGO SECUREMENT:
1. (Above) **RECESSED PULL-UP CHAIN TIE DOWNS.**
2. (Below) **BENSON (LOC-RITE) IN-DECK MULTI-POSITION TIE DOWN SYSTEM.**

TIRE CARRIER:
Optional, basket-type mounted on curb side.

UPPER COUPLER:
5/16" steel plate. Optional aluminum coupler plate provides lasting service and up to 110# weight reduction.
